The site you register creator ID's is here:

[www.developerpavilion.com/](http://www.developerpavilion.com/)

You need a separate account though. ...It appears to be down now...

Thanks for your help.  
I wait for a server to come to be usable.

Hi there,

If you are in need of registering a Creator ID, please send me a Private Message and I will do it manually until the service is back up again. Sorry for the trouble.

I sent a message one week ago, but there is not yet an answer.  
Does the request message arrive?

It's still not working...

How can something so crucial as Creator ID registration be not working for that long?
